

12C/650S/675LT Key Battery Replacement

Step 1: Remove the physical key from the fob by pressing in the catch on the side. Then slide the carbon back off.

You should end up with these pieces..

Step 2: Pry open the battery cover like above with a small bladed screwdriver or similar

Step 3: Flick out the battery carefully ensuring the small silver clip which acts as a battery contact, remaining in place.

Battery type is a type 2032 3v Lithium, always replace with a Varta or Duracell brand.
